Q3 Operations Report

Contents: Summary · Sites · Actions · Appendix

Summary

Output rose 6% on Q2 while energy use per unit fell 4%. Two sites missed their safety target; see actions.

Sites

Site	Output (t)		Detail
	Q2	Q3	
Leeds	1,240	1,310	Line: A — Uptime: 97%; Line: B — Uptime: 91%
Hull	860	905	• New kiln from August • Night shift added
York	530	548	No change

Energy

1. Heat recovery on line A
    a. Commissioned 4 July
    b. Saves 120 MWh a year
2. LED lighting in Hull

Actions

> **Safety:** Hull and York start weekly toolbox talks from 1 December. Owners report progress at each month end.

Next quarter

- Second shift in Leeds
- Kiln maintenance window, 8–12 January
- Supplier review
    - Packaging
    - Logistics

Appendix: method

Output is the weighed tonnage leaving each site. Uptime is planned production time minus stoppages, divided by planned production time. Energy per unit is metered site energy divided by output.
